~ Effective Communication Skills ~Hardworking ~Capability to work individually ~Good team member
~Organised

Projects

Project#1: **THE RETAIL SUITE (TRS)**

Technology Used: Angular 8, Kendo UI, ASP .NET Core, REST API, JSON, XML, SwaggerUI

Description:

The Retail Suite (TRS) is an integrated suite of advanced omni-channel retailing softwaresolution that enable greater customer-centricity, true omni-channel capabilities and increased profitability. My role was to revamp the application and shift it on the latest stack. I was involved on the front-end development of the application on Angular8 and Kendo UI.

Project#2: **SIBME(LMS)**

Technology Used: HTML CSS, BOOTSTRAP, JavaScript, TypeScript, Angular

Description: Sibme transforms education by offering educators a dynamic platform for collaboration, reflection, and growth. Through its user-friendly interface and powerful features, Sibme enables educators to enhance their teaching practices through video coaching, peer feedback, and professional learning communities. With Sibme, educators can easily share insights, engage in constructive dialogue, and drive continuous improvement in their teaching, ultimately leading to improved student outcomes.

Project#2: **E-COMMERCE WEBSITE**

Technology Used: HTML CSS, BOOTSTRAP, JavaScript, PHP

Description: A project developed as an E-commerence website using latest techniques by binding it dynamically with the backend. It was developed using the latest web standards and protocols.

Project#3: **COMMAND RESCUE 3D GAME**

Technology Used: UNITY 3D, C#

Description: This was my final year project. The main concept behind it was to create a fighting game in which users will get the experience of fighting with zombies and user will be rewarded by killing the zombies.

Personal Interests And Activities

~Gym ~Indoor Games like foosball ~Socializing ~Reading ~Writing ~Sports like Cricket

Experience
